Gemeinsamer Bundesausschuss

Resolution

of the Federal Joint Committee on an Amendment of the Pharmaceuticals Directive:
Annex XII – Benefit Assessment of Medicinal Products with New Active Ingredients according to Section 35a (SGB V)
Acoramidis (wild-type or variant transthyretin amyloidosis with cardiomyopathy)

of 18 September 2025

At their session on 18 September 2025, the Federal Joint Committee (G-BA) resolved to amend the Pharmaceuticals Directive (AM-RL) in the version dated 18 December 2008 / 22 January 2009 (Federal Gazette, BAnz. No. 49a of 31 March 2009), as last amended by the publication of the resolution of D Month YYYY (Federal Gazette, BAnz AT DD.MM.YYYY BX), as follows:

I. Annex XII shall be amended in alphabetical order to include the active ingredient Acoramidis as follows:

Acoramidis

Resolution of: 18 September 2025
Entry into force on: 18 September 2025
Federal Gazette, BAnz AT DD. MM YYYY Bx

Therapeutic indication (according to the marketing authorisation of 10 February 2025):

BEYONTTRA is indicated for the treatment of wild-type or variant transthyretin amyloidosis in adult patients with cardiomyopathy (ATTR-CM).

Therapeutic indication of the resolution (resolution of 18 September 2025):

See therapeutic indication according to marketing authorisation.

1. Additional benefit of the medicinal product in relation to the appropriate comparator therapy

Adults with wild-type or variant transthyretin amyloidosis with cardiomyopathy (ATTR-CM)

Appropriate comparator therapy:

- Tafamidis

Extent and probability of the additional benefit of acoramidis compared to the appropriate comparator therapy:

An additional benefit is not proven.

Study results according to endpoints:[1]

Adults with wild-type or variant transthyretin amyloidosis with cardiomyopathy (ATTR-CM)

There are no assessable data.

Summary of results for relevant clinical endpoints

Endpoint category	Direction of effect/ risk of bias	Summary
Mortality	n.a.	There are no assessable data.
Morbidity	n.a.	There are no assessable data.
Health-related quality of life	n.a.	There are no assessable data.
Side effects	n.a.	There are no assessable data.
Explanations: ↑: statistically significant and relevant positive effect with low/unclear reliability of data ↓: statistically significant and relevant negative effect with low/unclear reliability of data ↑↑: statistically significant and relevant positive effect with high reliability of data ↓↓: statistically significant and relevant negative effect with high reliability of data ↔: no statistically significant or relevant difference ∅: No data available. n.a.: not assessable		

2. Number of patients or demarcation of patient groups eligible for treatment

Adults with wild-type or variant transthyretin amyloidosis with cardiomyopathy (ATTR-CM)

Approx. 1,760 to 2,120 patients

3. Requirements for a quality-assured application

The requirements in the product information are to be taken into account. The European Medicines Agency (EMA) provides the contents of the product information (summary of product characteristics, SmPC) for Beyonttra (active ingredient: acoramidis) at the following publicly accessible link (last access: 27 August 2025):

https://www.ema.europa.eu/en/documents/product-information/beyonttra-epar-product-information_en.pdf

Treatment with acoramidis should only be initiated and monitored by specialists and general practitioners experienced in the treatment of patients with transthyretin amyloidosis with cardiomyopathy (ATTR-CM).

[1] Data from the dossier assessment of the Institute for Quality and Efficiency in Health Care (IQWiG) (A25-46) unless otherwise indicated.

Courtesy translation – only the German version is legally binding.

4. Treatment costs

Annual treatment costs:

Adults with wild-type or variant transthyretin amyloidosis with cardiomyopathy (ATTR-CM)

Designation of the therapy	Annual treatment costs/ patient
Medicinal product to be assessed:	
Acoramidis	€ 134,189.33
Appropriate comparator therapy:	
Tafamidis	€ 135,138.33

Costs after deduction of statutory rebates (LAUER-TAXE®) as last revised: 1 September 2025)

Costs for additionally required SHI services: not applicable

5. Designation of medicinal products with new active ingredients according to Section 35a, paragraph 3, sentence 4 SGB V that can be used in a combination therapy with the assessed medicinal product

In the context of the designation of medicinal products with new active ingredients pursuant to Section 35a, paragraph 3, sentence 4 SGB V, the following findings are made:

Adults with wild-type or variant transthyretin amyloidosis with cardiomyopathy (ATTR-CM)

- No medicinal product with new active ingredients that can be used in a combination therapy that fulfils the requirements of Section 35a, paragraph 3, sentence 4 SGB V.

The designation of combinations exclusively serves the implementation of the combination discount according to Section 130e SGB V between health insurance funds and pharmaceutical companies. The findings made neither restrict the scope of treatment required to fulfil the medical treatment mandate, nor do they make statements about expediency or economic feasibility.

6. Percentage of study participants at study sites within the scope of SGB V in accordance with Section 35a, paragraph 3, sentence 5 SGB V

The medicinal product BEYONTTRA is a medicinal product placed on the market from 1 January 2025.

The percentage of study participants in the clinical studies of the medicinal product conducted or commissioned by the pharmaceutical company in the therapeutic indication to be assessed who participated at study sites within the scope of SGB V (German Social Security Code) is < 5 per cent of the total number of study participants.

The clinical studies of the medicinal product in the therapeutic indication to be assessed were therefore not conducted to a relevant extent within the scope of SGB V.
